PROFILE

I believe the best innovation happens at the intersection of the digital and the physical. My Biomedical Engineering foundation gave me a disciplined approach to high-stakes work. Today I build robust hardware — from 3D CAD assemblies to precision PCB soldering — and fly what I build: CAAS UAPL Class A licensed, with autonomous drone competition experience.

EXPERIENCE

President, Mechanical Designer Club — Mar 2026 – Present
Singapore University of Technology and Design (SUTD)

- Plan and host introductory CAD workshops, SpeedCAD competitions, and vendor-led sessions with Autodesk SG and SolidWorks.
- Tools: Fusion 360, Siemens NX (Onshape in progress).

Publicity Director & UAV Team, Multirotor SUTD — 2025 – Present
Singapore University of Technology and Design (SUTD)

- Direct publicity and outreach (Director since Mar 2026): showcase drone projects, competitions, and club culture.
- AAVC 2025 (Thailand, Nov 2025): built a 22-inch scout with onboard computer vision that finds a mannequin and sends coordinates, and a 30-inch aircraft that flies there and manually releases the payload — flights autonomous.
- SAFMC 2026 High-Speed Drone Flock: built 2–3 drones for autonomous indoor gate-course flight; my part was UWB positioning (BU03).
- RobotX Challenge 2026 (RoboNation, Marina Bay): built the team's sub-7 kg UAV — autonomous navigation and payload delivery.

Freshmore Representative, 10th SAC Council — Feb 2026 – Present
Singapore University of Technology and Design (SUTD)

- Primary liaison for first-year students; guide the onboarding of incoming freshmores.
- Strategise, plan, and run events that build student engagement.

Private Tutor — Jan 2026 – Present
SmileTutor Pte Ltd

Air Force Technician — Dec 2023 – Jul 2025
Republic of Singapore Air Force — Tengah Airbase

- Used hand tools and calibrated equipment such as torque wrenches across different aircraft work areas.
- Worked to job guides and technical orders.

Assistant Technician — Sep 2022 – Nov 2022
Kinergy Corporation Limited

- Built Structo 3D dental printers; designed a jig that brought consistency to a sub-assembly.

SKILLS & TOOLS

Fusion 360 · Siemens NX · Onshape (learning) · 3D CAD & Assemblies · Rapid Prototyping · PCB Soldering · Solder Machines · Calibrated Tools · Tensile & Pressure Testing · Circuit Inspection · Fault Finding & Repair · Technical Documentation · Event Planning · Communication · Liaisoning

Certifications: Fusion 360 Workshop Completion · CAAS UAPL Class A (drone pilot licence)

EDUCATION

Bachelor of Engineering — Jul 2025 – Jul 2029
Singapore University of Technology and Design (SUTD)

Diploma in Biomedical Engineering (Biomedical Device Technology) — 2020 – 2023
Nanyang Polytechnic

HONORS & AWARDS

- Director's List (three awards)
- AAVC 2025
- 2nd Place, SUTD SpeedCAD Amateur League
